

Matching:

- | | |
|------------|---|
| 1. Point | A. A flat surface one point thick |
| 2. Line | B. Part of a line and has one endpoint |
| 3. Plane | C. Continues in both directions without end |
| 4. Segment | D. A position in space |
| 5. Ray | E. Part of a line and has two end points |

6. Write an equation to solve for x . Then find the numerical length of each segment

KL = _____
 MN = _____
 KN = _____

Matching:

- | | |
|--|------------------------------|
| 7. Segment RS | A. \overleftrightarrow{RS} |
| 8. Ray RS | B. RS |
| 9. Line RS | C. \overrightarrow{RS} |
| 10. Distance between point R and point S | D. \overline{RS} |

11. Is \overleftrightarrow{RS} the same as \overleftrightarrow{SR} ?

12. Is \overline{RS} the same as \overline{SR} ?

13. Is \overrightarrow{RS} the same as \overrightarrow{SR} ?

14. How many points are on a line segment?

15. How many numbers are between 0 and 1?
