

Which lines or line segments are parallel? Justify your answers.

Find the value of x for which $g \parallel h$.

1. An artist is building a mosaic.
 The mosaic consists of the repeating pattern shown at the right.
 What must be true of a and b to ensure that
 the sides of the mosaic are parallel?

2. Complete this proof.

Given: $d \parallel e, e \parallel f$

Prove: $d \parallel f$

Statements

1. $d \parallel e$
2. $\angle 1$ is supplementary to $\angle 2$
- 3.
4. $e \parallel f$
5. $m\angle 2 = m\angle 3$
- 6.
7. $\angle 1$ is supplementary to $\angle 3$
8. $d \parallel f$.

Reasons

1. Given
- 2.
3. Defn of supplementary angles
- 4.
- 5.
6. substitution property
- 7.
- 8.

Conclusion:

- 1. Write the equation of the line that passes through the point $(3, 7)$ and is perpendicular to the line**

$$y = \frac{2}{5}x - 1.$$

- 2. Write the equation of the line that passes through the point $(3, 0)$ and is parallel to the line**

$$2x + y = 3.$$

- 3. Write the equation of the perpendicular bisector of the line that passes through $(8, -2)$ and $(6, 4)$.**
