

Build A Prism

11.04

Cut out the pattern below, and form it into a prism. The triangles are the bases of the prism. The rectangles make up the lateral area of the prism. Use the figure formed in order to answer the following:

1. Write the area of each side on the side. Then compute the total surface area. S.A. = \_\_\_\_\_
2. Compute the volume of the prism.  $V =$  \_\_\_\_\_
