Chapter 9 Summary

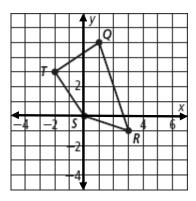

Do you know HOW?

- **1.** $\Delta R'S'T'$ is a translation image of ΔRST . What is a rule for the translation?
- **2.** Is a rotation a rigid motion? Explain.

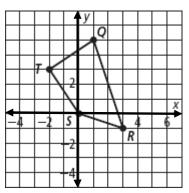

Find the coordinates of the vertices of each image.

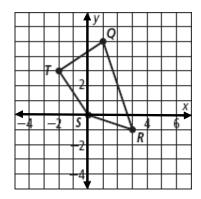

3. $R_{y-axis}(QRST)$

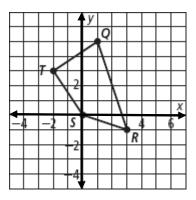

5. $D_5(QRST)$

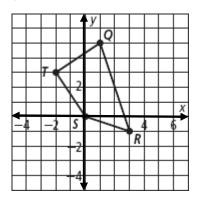

4. $r_{(270^{\circ}, 0)}(QRST)$

6.
$$T_{<2,-5>}(QRST)$$

7. $(R_{y=-2} \circ T_{<-4, 0>})(QRST)$

- 8. Vocabulary What is the image of (-6, 6) after a reflection across the y-axis?
- **9.** Coordinate Geometry $\triangle ABC$ has vertices at A(0, 5), B(4, 4), and C(-1, 0). Graph the image $T_{<-1, -2>}(\triangle ABC)$.

•

10. Graph the triangle whose vertices have the coordinates given below. Then draw its reflection across the y-axis.

(-6,2), (-2,3), (-2,6)

| | | | | | | | | | |

11. Given *P*(-7, 5), find the coordinates of the image $T_{<2,-5>}(P)$.

12. Graph points A and B. Find the coordinates of the endpoints of image if $r_{(90^\circ, 0)}(AB)$ A(1, 3) and B(-3, -4)
