

Geometry Sem 2 Week 3 Monday Warm-up

1. Graph and label the triangle with vertices $A(3,2)$, $B(-10,4)$, $C(-5,-8)$. Determine if it is scalene, isosceles, or equilateral. Then tell whether it is a right triangle. **SHOW ALL WORK.**

1. Given: $ABCG$ and $CDEF$ are \square s

Prove: $\angle A \cong \angle E$

2. Graph and label the quadrilateral with vertices:

$H(-2,-3)$, $I(4,0)$, $J(3,2)$, $K(-3,-1)$.

Then determine the most precise name for the quadrilateral.

Solve for x to the nearest tenth.

Remember that Hexagon is due Friday!

1. $\frac{x}{5} = \frac{7}{15}$

2. $\frac{x}{5} = \frac{7}{x}$

3. $\frac{3x+3}{15} = \frac{x}{4}$

4. $x^2 + 4x - 9 = 0$

5. Find the area of a square with a diagonal of 30 cm.

6. Matt invested \$500. He made 4% on his investment.
How much money does he have now?

What are the coordinates of the vertices of each figure?

7. rectangle with base b and height h

8. square with base of b

Week 3 Friday

Do page 7.03 for your warmup today!
