

Review Adding/Subtracting Fractions with Like Denominators

Answers must be reduced and written as mixed numbers where possible.

$$1. \frac{7}{8} + \frac{5}{8} =$$

$$2. 3\frac{5}{16} + 2\frac{13}{16} =$$

$$3. \frac{7}{20} - \frac{3}{20} =$$

$$4. 5\frac{1}{8} - 1\frac{5}{8} =$$

Adding/Subtracting Fraction with Unlike Denominators.

- Change any mixed numbers to improper fractions.
- Get the denominators to be the same in both fractions.
- Add or Subtract as indicated.
- Reduce and Change to a Mixed Number if possible.

$$5. \frac{1}{2} + \frac{1}{4} =$$

$$6. \frac{5}{8} - \frac{1}{4} =$$

$$7. 2\frac{13}{16} + 4\frac{3}{8} =$$

$$8. 3\frac{1}{2} - 1\frac{1}{8} =$$
